SLA 2013
Annual Conference & INFO-EXPO
9 – 11 June • San Diego, CA USA

Conference Preview

9 – 11 June
San Diego Convention Center
San Diego, California

www.sla.org/SanDiego2013

CONNECT • COLLABORATE • STRATEGIZE
The whole SLA experience was so amazing, really I haven’t even fully processed it. I keep going over my notes and spotting new things to go away and think about.

–Ned Potter, Academic Liaison Librarian, University of York
The SLA 2013 Annual Conference & INFO-EXPO promises to be an exhilarating event, jam-packed with innovative sessions, inspiring speakers, a first-rate exhibit hall, and tons of networking opportunities. This is your chance to CONNECT, COLLABORATE and STRATEGIZE with thousands of your colleagues in the industry!

Whether you’re an MLIS student or an experienced information professional, SLA 2013 has something for you. There will be valuable educational and networking opportunities for information professionals of all types, including:

- Research Directors
- Knowledge Managers
- Law Librarians
- Information Analysts
- Competitive Intelligence Specialists
- Content Managers
- Web Developers
- Consultants
- Educators
- Library/Information School Students

NOTE: The conference format has been refocused and redesigned for 2013 but will still provide attendees with three full days of conference programs. The new schedule allows attendees to do more in less time, potentially reducing hotel expenses and time out of the office.

JOIN THE CONVERSATION
Follow @SLA2013 for conference updates, and use hashtag #SLA2013 to tweet about the conference.

SPECIAL MEDIA LOUNGE
Sponsored by ProQuest & Dialog

Grab a seat and chat with friends both online and in person. Here, you can enter an exciting social media contest driven by ProQuest & Dialog, charge your electronics, and use computers wired with high-speed Internet access.

#SLA2013
Conference Highlights

GENERAL SESSION AND AWARDS PRESENTATION
Sponsored by Springer

Sunday, 9 June
9:00 a.m. – 11:00 a.m.
Join us as we honor our 2013 award recipients and outstanding conference partners before our featured speaker, Mike Walsh, takes the stage.

Mike Walsh is the best-selling author of Futuretainment, the CEO of innovation research lab Tomorrow, and a leading authority on emerging technologies and markets. He previously ran the market-leading consumer insights house, Jupiter Research, in the Asia-Pacific region, and has held senior strategy roles at News Corporation in both the Australian and Asian markets.

In his current role at Tomorrow, Mike advises the CEOs and senior management teams of companies such as BBC Worldwide, Fujifilm, Richemont, MSN, Star TV, Televisa, Globe Telecom, Philips, Merck Pharmaceuticals and HSBC.

Mike’s expertise is explaining new patterns of consumer behavior and disruptive technologies in emerging markets. His advisory work and keynote presentations provide unique insights into the growing influence of new markets on breakthrough innovation and business transformation.

CAREER CONNECTIONS
Sponsored by TRAK Records & Library
Strategize and gain hands-on career enhancement and job search tips in these five seminars and workshops, led by leading information professionals and trained recruiters.
ANNUAL BUSINESS MEETING AND PANEL DISCUSSION: CONNECT, COLLABORATE, STRATEGIZE.

Tuesday, 11 June
4:00 p.m. – 6:00 p.m.

Come hear SLA CEO Janice R. Lachance deliver the annual state-of-the-association presentation. In addition, SLA President Deb Hunt and Treasurer John DiGilio will report on the successes and planned initiatives of the association.

Following the annual business meeting, join us for an exciting panel of industry leaders who will discuss and examine topics that were popular during the conference and will continue to be important throughout 2013 and beyond. This highly engaging event will build on the momentum created by conference sessions and attendee interactions and will include content posted on social media platforms by conference attendees.

ONLINE CONFERENCE PLANNER
Sponsored by Dow Jones

For the most up-to-date information on the conference, please use the searchable online conference planner. You can use keywords to search hundreds of conference sessions and create your own personal itinerary. Since the conference preview program only highlights major conference activities and programs, you will need to visit the SLA Online Conference Planner at http://sla2013.sched.org for detailed and updated information on all conference events.

There's always somebody or something that inspires you.

–Jill Strand,
Director of Knowledge Resources Library,
Maslon Edelman Borman Brand, LLP
Spotlight Sessions

Spotlight Sessions are collaborations between SLA divisions that bring attendees targeted, high-quality learning opportunities.

SUNDAY, 9 JUNE

11:45 a.m. – 1:15 p.m.
Position Your Career and Your Library for the Next Boom
This presentation, based on Jack Plunkett's book The Next Boom: What You Absolutely, Positively Have to Know About the World Between Now and 2025 will be a fast-paced and authoritative look at the changes, technologies and trends that will shape the near future. This session is appropriate for librarians across the information spectrum.

1:30 p.m. – 3:00 p.m.
e-Books and How They Affect Special Libraries
Unlike many public libraries, special libraries develop and maintain collections not only for access but also for preservation and to build a complete collection. The current database model of e-book lending and the copyright issues surrounding e-books do not bode well for the special library model. This stimulating session will explore these issues with a panel of special librarians and a member of the publishing industry, who will discuss what the needs are and what can be done about them.

3:30 p.m. – 5:00 p.m.
The Experts Are In! One-Off Career Advice
Do you have a vexing workplace issue and are not sure where to turn? Are you facing a career decision and would like some advice from senior SLA members who have “been there?” Using a speed dating format, you will have the opportunity to run your challenge past some of SLA’s most knowledgeable and experienced members.

MONDAY, 10 JUNE

8:00 a.m. – 9:30 a.m.
The Race to the Patent Office: The Impact of the America Invents Act
The America Invents Act (Patent Reform Act), set to go into effect in March 2013, will switch the U.S. patent system from “first to invent” to “first to file” and is the most significant change to the U.S. patent system in nearly 60 years. A panel of speakers will discuss how the act has affected the patent process and the dramatic and unforeseen impacts they have seen since the law went into effect.

10:00 a.m. – 11:30 a.m.
Organizing Knowledge
Patrick Lambe, founder of Straits Knowledge and author of Organising Knowledge: Taxonomies, Knowledge and Organisational Effectiveness, will share insights into the roles that taxonomies can play in knowledge and information management. Patrick will look at a variety of ways in which taxonomies can underpin other important knowledge management applications, such as content management systems, records management systems, search, and data warehouses.
12:00 p.m. – 1:30 p.m.
**Big Data, Big Challenges**
Join a panel of corporate and academic librarians and the researchers they work with to learn about emerging roles for librarians and information professionals and the services and resources needed to support the analysis, curation and reuse of large data sets. The data deluge—data-intensive science, social science and information networks—is here. Are you ready?

4:00 p.m. – 5:30 p.m.
**The Digital Preservation Network**
Digital technology has enabled an unprecedented growth of knowledge in essentially all areas of scholarly activity. Digital collections are proliferating at network speed, but they typically are not durable and remain susceptible to multiple points of failure. The emphasis in building these collections tends to be more on providing current users with access rather than on preserving them for the future. This session will examine the efforts of the Digital Preservation Network to rectify this situation by building upon the higher education community’s current efforts and creating a federated preservation network that will provide secure digital preservation of the scholarly and cultural record.

**TUESDAY, 11 June**

7:30 a.m. – 9:30 a.m.
**Practitioner Picks: Best CI Techniques in Legal, Science and Finance**
Competitive intelligence practitioners from three industries will share the top tool or technique they use to gather and analyze information and report intelligence to their clients. See the versatility of CI in action as you learn how unique approaches suit different industries.

10:00 a.m. – 11:30 a.m.
**Researching Emerging Issues: Climate Change through a Kaleidoscope**
The speakers will use the topic of climate change to explore strategies that can be used to research emerging issues. They will prepare the audience to investigate a new topic and draw out common approaches for tackling complex research challenges.

2:00 p.m. – 3:30 p.m.
**Collecting Dangerously: The Hows and Whys of Controversial Collections**
Special librarians are often charged with covering subjects from every possible angle, even if they’re controversial. This will be a thought-provoking presentation of different controversial collections and a discussion of how they have been developed and presented to both the public and their organizations.

“As a new professional, the chance to encounter so many enthusiastic people and interesting ideas is invaluable.”

—Samuel Wiggins, Information Officer, Norton Rose LLP
**SLA 2013 PRELIMINARY SESSION SCHEDULE**

*This schedule only lists educational programs. For a full listing of sessions and events, including meetings, meals, evening events, roundtables, and tours, please visit http://sla2013.sched.org.*

Continuing Education Sessions

Get in-depth information through high-impact workshops (half day) and learning forums (full day).

*All continuing education sessions will be held on Saturday, 8 June. These sessions have an additional cost associated with them. Prices are listed on the preliminary session schedule. Tickets will go on sale 11 February.

SATURDAY, 8 JUNE

8:00 a.m. – 12:00 p.m.

The Accidental Systems Librarian
Anyone with a solid foundation in the practices and principles of librarianship and a willingness to learn about changing technology can be an effective “accidental” or “planned” systems librarian. Participants will receive practical advice on using research communication and organizational skills to solve various systems problems, and will develop the confidence they need to succeed in a world of mobile, open source, social networking, and e-book technologies.

Chemistry for the Non-Chemist Librarian
Learn about the basic principles of the five major divisions of chemistry, chemical terminology and drawing, and other intellectual tools that chemists need to do their work. This hands-on course includes an introduction to chemistry as a science, strategies for effective communication with chemists, basic chemical concepts and research questions, and the ways in which chemists’ research needs dictate their information needs.

Preparing for, Planning and Managing a Sales Call
By setting clear goals and expectations, info pros can make the most of sales calls and develop mutually beneficial relationships with vendors. The instructor will cover negotiating skills and how to efficiently prepare for the meeting, and participants will come away from the session with checklists for the next vendor meeting or contract negotiation.

Thinking Strategically and Building the Future
Learn practical ways to consider and understand strategic contexts. This workshop includes a look at scanning for impacts and influences, an intensive discussion of techniques, an application of these techniques in a case study, and an exploration of resources that will help participants think more strategically and align their services with organizational strategies.

8:00 a.m. – 5:00 p.m.

Information Is Beautiful:
Using Design to Enhance Your Narrative
Effective visualization techniques allow for rapid consumption of critical points while keeping length to a minimum. The use of narrative and design turns complex data and information into simple, easy-to-understand implications. From Tuft to TED, participants will explore a variety of ways to use infographics and design to illustrate the narrative.

Introduction to Taxonomies
A fast-moving and powerful introduction to the theoretical and practical aspects of building a taxonomy, thesaurus or ontology. After defining controlled vocabularies and identifying core standards, participants will explore the key concepts of taxonomies, thesauri, indexing, classification and filtering. Attendees will put concepts into practice through multiple exercises, and taxonomy, indexing, and related software tools will be demonstrated.

www.sla.org/SanDiego2013
Patent Research: The Next Level
Patents mean big business! This course will cover free and commercial resources for patent research, explain different patent classification systems and highlight their strengths and weaknesses, explore advanced research techniques for prior art research, and discuss patent enforceability. Students will be able to define a patent, label its parts, and explain the opportunities for librarians in patent research.

1:00 p.m. – 5:00 p.m.

Chemical Information Sources
What types of questions do chemical researchers ask? What reference sources can be used to answer them? This course provides an overview of the structure of the chemical literature, types of reference sources in the chemical sciences, unique access points for chemical information, and strategies for an effective search. Informal lectures, interspersed with hands-on reference questions, will compare and describe the major chemical information resources.

The Road to Successful CI: From Novice to Expert
Designed for the novice as well as the advanced practitioner, this workshop will examine what competitive intelligence is and is not. Learn how info pros can transition to CI, from sourcing and supporting primary and secondary search to using analytical tools to mastering reporting methods and templates. Get real examples of how to establish, manage and grow an intelligence function. The instructors will use group exercises, open discussions, and practical case studies.

Social Media Techniques for Info Pros
Social tools are changing the landscape of competitive and business information gathering. As a business and competitive researcher, learn which social media tools will give you the best company and industry information. See how to complement traditional resources for business and company information with the effective use of social media tools such as LinkedIn, blogs, Twitter feeds, social networking groups and other specialized search tools.

“Besides the great new contacts I made, I also learned plenty that I am already starting to put into practice in my day-to-day work.”

–Laura Woods, Research Analyst, Addleshaw Goddard

** S/D = single or double.

At SLA 2013 in San Diego, everything you need is easily accessible. The San Diego Convention Center is within walking distance of conference hotels, restaurants, bars, and shops.
In addition to the very valuable sessions, attending the conference also provided me with a chance to be very warmly welcomed into the SLA family and to meet in person Legal Division members.
