

## Accessing and Downloading General Session and Educational Session Materials:

Session materials have been shared at the discretion of the speaker, and may be found in one of two places –

- on the educational session page
- on the speaker/presenter page.

The materials can be opened on any device using the directions below, either through the mobile app itself (available for Android and iOS devices) or the SLA Annual Conference web-based version of the app: <https://event.crowdcompass.com/sla-17>

1. Select the educational session or speaker of your choice.
2. Once you are on the appropriate page, scroll to the bottom. The files will be found at the bottom in PDF format.
3. Be sure to check both options when looking for materials, and please note that not all presentations were loaded onto the app.

***Hint:*** To get the most updated information, please remember to refresh the app regularly.

## Saving and Printing Materials:

If downloading the files to save as a resource or share with colleagues, it is best to use a computer and visit the SLA 2017 Annual Conference web-based version, using the same instructions listed above: <https://event.crowdcompass.com/sla-17>
